Georgia Final 2020 Presidential Results, Georgia
Secretary of State Brad Raffensperger (R) held a
briefing in Atlanta to provide an update on the
State's final 2020 election results
(December 7, 2020)

Plaintiffs' Exhibit

PTX-292

C.A. No. 21-3354 (BAH)

Page 2	Page 4
<p>1 MAN 1: This news briefing was held in 2 Atlanta. 3 BRAD RAFFENSPERGER: Okay. Let me get 4 rid of that thing. Okay, good morning. I'm glad 5 you're here bright and early. I'm sure you have 6 a place to be probably around ten o'clock. 7 It's been a long 34 days since the 8 election on November 3. We have now counted 9 legally-cast ballots three times, and the results 10 remain unchanged. 11 As Secretary of State, I have worked to 12 secure the vote for all Georgians. On day one, 13 we outlawed ballot harvesting. We strengthened 14 signature match through the GBI training and 15 moved towards and auditable paper-ballot system. 16 I am the first Secretary of State to implement a 17 driver's license requirement for online absentee 18 ballot applications, which strengthen the 19 security of our absentee ballot process. 20 Whether it is the President of the 21 United States or a failed gubernatorial 22 candidate, disinformation regarding election 23 administration should be condemned and rejected. 24 Integrity matters. Truth matters. 25 Today, the Secretary of State's office</p>	<p>1 years. I know what it takes to build teams that 2 work to strengthen buildings, restore and 3 strengthen old landmarks. And I have also built 4 a team that knows how to win an election. 5 I also have built a team that knows how 6 to run and oversee elections. And I understand 7 we need to focus on the future of growing 8 businesses here in Georgia, getting through the 9 COVID pandemic and bringing more good paying 10 Georgians to our state. 11 The vast majority of Georgians, 12 Republicans and Democrats, want us, all of us, as 13 elected officials, to focus on protecting and 14 growing Georgia jobs, getting the vaccine out as 15 efficiently as possible, and getting back to 16 normal. 17 The focus on November 3 is drawing 18 energy away from those goals. The President has 19 his due process rights, and those are available 20 to him. It's time we all focus on the future and 21 growth. 22 I know there are people that are 23 convinced the election was fraught with problems, 24 but the evidence, the actual evidence, the facts, 25 tell us a different story.</p>
Page 3	Page 5
<p>1 will be recertifying our State's election 2 results. Then the safe harbor, under the United 3 States code, to name electors is tomorrow. And 4 then they will meet on December 14, to officially 5 elect the next president. 6 While we continue our investigations to 7 their conclusions, and where prosecution is 8 necessary, we will work with the State Election 9 Board to refer them to the proper prosecutors. 10 We are working with the counties to 11 assure a fair, safe and secure election for 12 January 5. We will continue to take steps to 13 assure that only legally-registered Georgians 14 will be casting ballots. 15 So, let's discuss where we are and 16 where we are heading in Georgia. All this talk 17 of a stolen election, whether it's Stacey Abrams 18 or the President of the United States, is hurting 19 our state. Georgia is the number one state in 20 the nation to do business, for nearly a decade. 21 Continuing to make debunked claims of a stolen 22 election is hurting our state. 23 I started my business and built it from 24 the ground up. I've employed hundreds and 25 hundreds of Georgians, men and women, in those</p>	<p>1 Business owners across Georgia know 2 it's time to focus on the future. Georgians have 3 serious issues that need to be addressed. I am 4 looking forward to a great Christmas time, and 5 then a good legislative session. We will have 6 our elections bill brought forward. It will be a 7 major reform of the election processes, where I 8 will work with the legislature, the Governor, 9 Lieutenant Governor Duncan, and we can all work 10 together to help all of our businesses and make 11 Georgia an even better place to do business; so 12 that each and every Georgian can get a good job, 13 or those brave entrepreneurs can start their next 14 small business. It is now time to direct our 15 energies towards the January 5 runoff election, 16 and then to making Georgia an even better place 17 to grow your businesses, raise your families and 18 enjoy prosperity here in Georgia. Thank you. 19 GABRIEL STERLING: Good morning. I 20 didn't bring my computer today. (Indiscernible) 21 a few numbers to go through. First, as the 22 Secretary pointed out, we will be recertifying 23 today. We are waiting on the County Elections 24 Board meeting in Coffee County. They knocked off 25 work on Friday. We tried to talk to them again</p>

2 (Pages 2 - 5)

<p style="text-align: right;">Page 6</p> <p>1 this morning; they weren't quite in the office 2 yet. So, we don't know the exact time of that 3 meeting, but we are working to figure that out. 4 As he pointed out, the safe harbor is 5 tomorrow, so we still have time to have the bills 6 of ascertainment sent to DC, so the electors can 7 be set properly. 8 All right. Moving onto the January 5 9 election, so far, we have 1,037,172 absentee -- 10 I've talked too much the last week, guys -- 11 1,037,172 absentee ballot applications have been 12 put into the voter registration system. We have 13 about 39,259 that are on the dashboard for the 14 online request process. So, that's a total of 15 1,076,431. So far, 43,289 voters have already 16 had their ballots accepted at the county level. 17 And this is a new number to talk about 18 -- the ballot tracks system, which is the system 19 we put in place to allow for proactive 20 notifications to go out -- we have 240,912 voters 21 signed up for that right now. And of those, 22 12,547 have already got their ballots into us. 23 And now I'll move onto what I'm going 24 to call Disinformation Monday, out of the gate. 25 Many of you all saw the videotape from State Farm</p>	<p style="text-align: right;">Page 8</p> <p>1 So, our Elections Director for the 2 State, called the Fulton County Elections 3 Director, Rick Barron, who was the English Avenue 4 warehouse doing Election Day activities -- not at 5 State Farm Arena -- and said, "Why are you all 6 knocking off?" And basically said, "What do you 7 mean? We're not knocking off." And he goes, 8 "Well, from what we understand, at State Farm, 9 they are." 10 So, Rick got off that phone call. 11 Then, you see Ralph Jones, at State Farm Arena, 12 getting a phone call around that time, as he's 13 literally, with blue seals in his hand, to seal 14 up these containers. And you can see his 15 shoulder is kind of slumped for a second, and he 16 goes over and does some more work on the side, I 17 think ginning up the courage to go tell these 18 workers, who had been there all day, "Hey guys, 19 we have to stay here longer, to keep scanning at 20 least the batches we have." 21 So, you could watch all this happen. 22 You could see it from the beginning to the end. 23 We watched the beginning of that thing -- and 24 let's be clear -- there was no watermain break; 25 there was a urinal that they turned off during</p>
<p style="text-align: right;">Page 7</p> <p>1 Arena. I spent hours with our post certified 2 investigators. Justin Gray from WSB spent hours 3 with us going over this video to explain to 4 people that what you saw, the secret suitcases 5 with magic ballots, were actually ballots that 6 had been packed into those absentee ballot 7 carriers by the workers, in plain view of the 8 monitors and the press. 9 The reason they were packed away is 10 because they were under the misbegotten 11 impression that they were getting to go home. 12 Which, if you notice, when you go back to see the 13 videos on this, they were packing these things up 14 10:00, 10:30 at night. You see some of the same 15 people there at 7:00 and 7:30, and 8:00 in the 16 morning, setting up those tables. They had been 17 there all day long. They were tired and wanted 18 to go home and they thought they could. 19 What happened around that time, for 20 many of you who were with us on election night, 21 saw the Secretary leaving around a similar time. 22 We had heard that they were knocking off for the 23 day and he was, understandably, not happy with 24 that and made that very clear, I think, on the 25 way out the door.</p>	<p style="text-align: right;">Page 9</p> <p>1 the downtime at State Farm, because there's no 2 events going on there, and they had a little slow 3 leak that came over the side. We have a 4 videotape, and we're working to get this 5 videotape online, but it's 80 gigabytes and we 6 don't really have a tool to let you all through 7 it right now. We're trying to figure that out 8 right now. So, we've got it into manageable 9 bytes of the most important parts of the day, 10 that should be, hopefully, online today or 11 tomorrow. 12 So, you'll see, when they walk in and 13 they see the obvious water leak on the floor; you 14 will see, when they move all the stuff out of the 15 way; you will see the Zamboni little carpet drier 16 thingy driving around. I mean, you can see all 17 these things happen. You can see the table get 18 put in place. 19 And what's really frustrating is the 20 President's attorneys had this same videotape. 21 They saw the exact same things the rest of us 22 could see, and they chose to mislead state 23 senators and the public about what was on that 24 video. 25 I am quite sure that they will not</p>

3 (Pages 6 - 9)

<p style="text-align: right;">Page 10</p> <p>1 characterize the video, if they try to enter it 2 into evidence, because that is the kind of thing 3 that could lead to sanctions; because it's 4 obviously untrue. They knew it was untrue and 5 they continue to do things like this. So, that's 6 one.</p> <p>7 Ware County. There are no seized 8 machines in Ware County. Not true. Did not 9 happen. There was a written report from an 10 activist who says the hand count was 37 off. It 11 was. He says the only reason it could be off is 12 because of an algorithm in the machines, which is 13 ridiculous. What have we been saying since the 14 beginning? The most obvious fault point in any 15 of the system is the human beings who were 16 counting them. Again, it was .26 percent. 17 That's pretty close, especially when all the 18 studies show you expect a 1 to 2 percent 19 differential on hand-counted ballots.</p> <p>20 And if you take that map, and that 21 biggest part of the hand-counted ballots that you 22 could have problems on, is the mail-in absentee. 23 If you look at 25 percent of 1 to 2 percent, what 24 does that get you? About 2.26 percent. So, 25 that's well within the normal range. There is no</p>	<p style="text-align: right;">Page 12</p> <p>1 I have to keep on standing here and saying these 2 things, but I do.</p> <p>3 So, there is no algorithm. The five 4 million ballot hand count proves there's no 5 algorithm switching votes.</p> <p>6 Is there any other disinformation I 7 missed over the weekend, guys? Justin, I'm not 8 sure.</p> <p>9 JUSTIN: We're getting the same 10 messages here. So, the one I keep hearing over 11 and over, is a woman scanning ballots over and 12 over and over again. Can you explain whether the 13 machines can count a ballot three times?</p> <p>14 GABRIEL STERLING: Well, if it counted 15 it five times, guess what? It would have shown 16 up in the hand count. Because if you do the same 17 batch -- and let's say -- I don't even know how 18 many there were -- 100, 200, whatever it was -- 19 and (indiscernible) do it three times, they would 20 have been 600 off on that, on the hand count; 21 they weren't.</p> <p>22 I mean...it's just, as I've said, and 23 you all have heard me say it before, it's like a 24 ridiculous game of whack-a-mole. You just keep 25 on finding the next one. We're now at the point</p>
<p style="text-align: right;">Page 11</p> <p>1 algorithm proof. There are no seized machines.</p> <p>2 I believe some people are trying to 3 conflate this with some of the machines being 4 inspected in Michigan, but that's just not the 5 case.</p> <p>6 And then, specifically, a United States 7 congressman sent this disinformation out on his 8 Twitter. He wrote it himself. Again, it's 9 irresponsible.</p> <p>10 I was the campaign manager, years ago, 11 in 1994, for the first Republican to get that 12 Tenth District seat. He would never have acted 13 that irresponsibly, and I'm frustrated that we 14 continue to see people who are put in positions 15 of responsibility, sending out this 16 disinformation and undermining the electoral 17 system.</p> <p>18 Okay. Another one: Jen Jordan and 19 Elaina Parent did not get on a plane to go count 20 votes in Pennsylvania. Okay? They basically 21 said, "Here's a picture of a blond woman in a 22 mask. Here's another picture of a blond woman in 23 a mask. Obviously, there's a conspiracy where 24 Democrat state senators are counting ballots in 25 Pennsylvania." It's ridiculous. I can't believe</p>	<p style="text-align: right;">Page 13</p> <p>1 where they've recycled them. They're going back 2 to the algorithm thing that have been debunked 3 before.</p> <p>4 So, all right, what other questions 5 have we got? Yes?</p> <p>6 WOMAN 1: [OFF MIC] ...if you can 7 explain, I think some people don't understand 8 that there is a (indiscernible) machine and that 9 (indiscernible).</p> <p>10 GABRIEL STERLING: There's two 11 different types -- well, there's four different 12 buckets of two different types of ballots, and 13 let's go through those right now.</p> <p>14 You have the traditional hand-marked 15 paper ballots, which we're all used to. They 16 were kind of like old Scantron sheets, when we 17 took our SATs when we were in high school and 18 stuff, where you bubble something in. And in 19 this state, those cover the provisionals, 20 occasionally the emergency ballots, if they don't 21 have the regular ballots going, and then the 22 absentee by mail. That's one. That's about 23 probably 25 percent of our overall votes.</p> <p>24 About 75 percent of our votes come from 25 the ballot marking device, which was the new tool</p>

4 (Pages 10 - 13)

Page 14

1 that the legislature adopted in a bill in 2019,
2 that we had a state procurement under; there were
3 three bidders. Dominion Voting Systems won that
4 bid process. There was no challenge to that bid
5 process, meaning it was a very clean bid process.
6 And we began the deployment of those that summer,
7 and we made the initial delivery deadline of
8 Valentine's Day of 2020.
9 That machine, you take a screen...you
10 check in on a device that has nothing to do with
11 the voting machines. This is just to identify
12 you and then give you a card to give you your
13 ballot on the ballot marking device. You insert
14 that card; it then brings up your ballot on the
15 screen. You then make your selections on that
16 screen, and when you are done, you'll say, "Print
17 ballot." You print the ballot; it comes off an
18 HP printer.
19 You can look at that ballot, assure
20 that your choices are the choices you intended to
21 make, and then you take that to a completely
22 different machine. It's a scanner that's in the
23 polling location; you can have one or two,
24 occasionally three scanners in there. And you
25 drop it into that. You can watch it, the counter

Page 15

1 go up to one, one (indiscernible) as your ballot
2 goes through. And at that time, it tabulates it
3 on there, and it takes an image of your ballot.
4 So, we have two things it's capturing on that.
5 And then from there, the memory cards
6 from those are taken to the central location
7 where they have their central election management
8 system, to tabulate all and aggregate all of the
9 ballots together. So, there is an artifact of
10 where the voter made a choice that exists -- and
11 by law it has to be held for another two years
12 under Georgia law; I think 22 months under
13 federal law.
14 So, and that's what we use for the hand
15 retally. Those are the same ballots we used for
16 the recount that we are recertifying today. Does
17 that cover your question.
18 WOMAN 1: I have one more.
19 GABRIEL STERLING: Yeah.
20 WOMAN 1: There is a lot of questions
21 about signature audit and (indiscernible)...
22 there's a lot of information going around that
23 this ballot (indiscernible)...
24 GABRIEL STERLING: The ballot envelope
25 is under the same law, so keep the ballots alive,

Page 16

1 also have those for two more years. And there
2 will be Governor Kemp and Secretary Raffensperger
3 are working together. We're going to be bringing
4 in the GBI as handwriting experts to go over
5 those specific counties where there are specific
6 allegations about any issues around the signature
7 match, with the absentee ballots. But that is
8 not a statewide, you know, signature audit.
9 Because one of the remedies asked for -
10 - and the Powell lawsuit is, if there's a certain
11 percentage -- they don't really say what -- that
12 don't match -- and it's a subjective measure. As
13 we all know, everybody's -- signatures can change
14 -- it's a subjective measure. So, if you're
15 arguing over that, then they'll say a certain
16 percentage. If we get to that certain
17 percentage, throw out all of the absentee
18 ballots, which is a ridiculously, over-the-top
19 hammer that no federal court is going to allow.
20 So, again, it was an unnecessary thing,
21 but to -- we always investigate when we have
22 specific allegations. When there's a specific
23 allegation to investigate, we'll do it. But a
24 generalized, "We don't like the outcome. We
25 think this is a faulty part of the system," --

Page 17

1 we're not going to do that.
2 But we have said before, the place in
3 the system that is the most likely to have an
4 issue is going to be in the absentee by mail
5 program. Because in person, we always present an
6 ID. So, we absolutely know that the person who
7 is voting is that person who's supposed to be
8 voting legally.
9 WOMAN 1: Gabe?
10 GABRIEL STERLING: One second, let me
11 go over there.
12 WOMAN 2: In the recount result, Fulton
13 County looks like it has almost 900 fewer votes
14 in the recount. Why is that and does that worry
15 you?
16 GABRIEL STERLING: It's about two votes
17 per precinct; it's a big county. It's a little
18 worrisome. And my best guess is they have a
19 batch somewhere they didn't get. And we've been
20 asking about it. The problem is the clock's
21 running -- the clock ran out. It's a big, big
22 county. They've had managerial issues, we know
23 that. And of those ballots, because they were so
24 heavily for Vice President Biden, that means his
25 total in the statewide counts -- I'm sure we've

5 (Pages 14 - 17)

<p style="text-align: right;">Page 18</p> <p>1 all seen online -- is about 900 lower. But 2 again, not enough to make up the difference of 3 12,000. 4 It's frustrating because, again, we see 5 these managerial issues coming out of Fulton 6 County. And I know they're tired. I know 7 they're put upon, to a degree. But to 8 consistently have these and have -- we had that 9 press conference at (indiscernible) where we put 10 up all the headlines from like 1995 on; none of 11 this is new with them. So, it is frustrating. 12 It's a little irritating. 13 Another anomaly we saw was Appling 14 County, where they had 49 ballots that had been 15 stuck in adjudication -- not stuck in; they got 16 left in. We literally did a phone call to every 17 country that says, "Hey, we know this is a 18 problem with some counties. Make sure you get 19 your ballots off adjudication." They didn't, 20 until this final time. So, everybody's learning 21 this new system. It's a high stress environment 22 right now because the presidential election was 23 so close. So, those kind of things are going to 24 happen. And that's -- when you've handled these 25 ballots now three times, there always going to</p>	<p style="text-align: right;">Page 20</p> <p>1 into these (indiscernible)? 2 GABRIEL STERLING: Well, the main role 3 they would have is they have expertise in the 4 handwriting, so they would a big part of, I 5 think, of the 250 -- I think there's 18 -- and I 6 could be wrong, but I think it's about 18 cases 7 having to do with absentee ballot and absentee 8 ballot handling. So, that would be the main 9 thing I think they go through. I don't know the 10 manpower that they're going to be throwing at the 11 whole thing for all the other cases. 12 And let me make one other thing clear: 13 The 250 cases is all of 2020 that are still open. 14 From November on, it's a lower number, a subset. 15 I will try to get that number to you all, because 16 I know the people are saying they call came out 17 of the general election. That's not exactly 18 true. It was 250 for all of 2020. And that's 19 probably my fault, because I put the Excel 20 spreadsheet and grabbed everything from 2020 into 21 the count. So, I'm going to go back and do that 22 again to get the subset proper. 23 Yeah, Justin? 24 JUSTIN: Two questions. One 25 (indiscernible).</p>
<p style="text-align: right;">Page 19</p> <p>1 look different because human beings are involved 2 in the process. Yes. 3 MAN 1: How many new voters have 4 registered for the runoffs since the November 3rd 5 election? 6 GABRIEL STERLING: I don't have the 7 answer to that question. We'll try to get it. 8 Part of the reason we don't, is because only as 9 of last Tuesday or Wednesday, really, could 10 Fulton, DeKalb and Clayton put in any new 11 registrations in, because they were involved in 12 their large runoffs. Yes? 13 WOMAN 2: In the suit that the Trump 14 campaign filed in Fulton County Superior Court, 15 they say there are literally tens of thousands of 16 illegal votes that were (indiscernible) and 17 included in the tabulation (indiscernible). Do 18 you know what they're talking about? And what's 19 your response to that (indiscernible)? 20 GABRIEL STERLING: No, I have idea what 21 they're talking about, but they need to present 22 their evidence if they make that kind of claim. 23 MAN 2: Gabe, you mentioned the role of 24 the GBI. What will their role be in helping the 25 Secretary of State investigators who are looking</p>	<p style="text-align: right;">Page 21</p> <p>1 GABRIEL STERLING: That's fine. 2 JUSTIN: The one for me is about that 3 gap that we keep hearing about that -- you say 4 it's about a hour before (indiscernible) started 5 counting before your observer got back. Can you 6 explain any -- I guess, what happens to the votes 7 counted in that gap? I mean, that's why we have 8 a recount, right? There's -- 9 GABRIEL STERLING: There's a secondary 10 thing about this. Under our state law, observers 11 are allowed to be there; they are not required to 12 be there. That's the main thing. So, this is 13 not illegal counting, as it says. 14 Now, I understand the frustration, 15 especially on the Republican side, because, as I 16 said before, everybody in that room thought they 17 were getting to go home. The press -- I mean, 18 the workers were leaving, the press is like, 19 "Well, we may go ahead and leave." There's no 20 reason that the election workers couldn't think - 21 - I mean the observers couldn't think the same 22 thing. They were all literally boxing things up 23 and putting seals on. The doors were not locked. 24 Nobody was kept out. 25 It's frustrating, because I know</p>

6 (Pages 18 - 21)

<p style="text-align: right;">Page 22</p> <p>1 somebody might have said -- because there's no 2 audio to this, is a problem -- so all it's going 3 to be a he said-she said from now, ad infinitum. 4 And somebody said, "We're done for the night," 5 but nobody said, "All of you people have to 6 leave. There was nobody directing people to 7 leave." In fact, while people were in the room 8 still working, the observers could have stayed 9 for that, because things could happen then too as 10 they're boxing things up. 11 So, I'm not saying it's the observers' 12 fault, or the press's fault. It was a long day 13 for these people. And let's just use some common 14 sense, which I know is such a rare thing to say - 15 - that they were tired and wanted to go home. 16 They were frustrated when they didn't get to go 17 home. So, I think everybody's kind of under the 18 impression, they're leaving, it's 10:30 at night, 19 let's let it go. And then they started working 20 again once we -- the irony is, we can't win for 21 losing. We called Fulton County to say keep on 22 working. They keep on working. All of a sudden, 23 there's a giant conspiracy, they worked when 24 nobody was there -- because they were frustrated 25 they weren't working long enough.</p>	<p style="text-align: right;">Page 24</p> <p>1 level. They get vital records to come in. They 2 just deal with it, usually monthly or weekly, 3 depending on the processes they have in place. 4 Now, secondarily, as we have made very 5 clear, when the ballot envelope is separated from 6 the secrecy sleeve, there is no way to go claw 7 that vote back; it is in the system. Same thing 8 is if somebody goes and early votes in person, 9 and gets hit by a car, you can't go back and get 10 that ballot back out. It's just physically 11 impossible, given the privacy rules in our state. 12 So, again, does that answer your question? All 13 right. 14 WOMAN 1: One more. (indiscernible) 15 register to vote (indiscernible). 16 GABRIEL STERLING: Today is the final 17 date for Georgians to register to vote in the 18 January 5 runoff election. 19 WOMAN 1: What time is the cutoff? 20 GABRIEL STERLING: If you can go to the 21 -- it's usually when their doors close, at the 22 registrar, as we do in person. You can go to the 23 online portal, if you have a driver's license 24 attached to your voter registration -- or, if you 25 have a driver's license, because we can find your</p>
<p style="text-align: right;">Page 23</p> <p>1 So, it's kind of a circular thing. But 2 we're trying to keep counties diligently working 3 to meet the goal of getting these election 4 results out quickly. 5 And then, because there was a 6 miscommunication from the manager at Fulton 7 County, to the manager at the State Farm, who 8 thought they could finish, that caused all of 9 this. 10 JUSTIN: Second question -- 11 GABRIEL STERLING: Yeah. Okay, who is 12 it from, before -- 13 JUSTIN: (indiscernible) reporter 14 (indiscernible). 15 GABRIEL STERLING: Okay, that's fine. 16 JUSTIN" He's talking about what 17 happens when a voter dies? Some states have laws 18 on the books that if you voted in early -- voted 19 before the election day, cast an early ballot it 20 doesn't count. What happens to that vote if a 21 voter dies before the election? And what's the 22 process of getting a dead voter off the rolls? 23 GABRIEL STERLING: I'll start with the 24 easy part. The main process is getting the dead 25 voter off the rolls is handled at the county</p>	<p style="text-align: right;">Page 25</p> <p>1 information from that. And that goes until 11:59 2 tonight. 3 WOMAN 2: (indiscernible). 4 GABRIEL STERLING: Yes? 5 WOMAN 2: Are these certified now, or 6 what time do you expect to certify? 7 GABRIEL STERLING: As I pointed out in 8 the beginning, we're waiting for Coffee County to 9 do their certification. And they took the 10 weekend off, and we talked -- I talked to 11 somebody who talked to the county commission 12 chairman, who hasn't been told yet when they're 13 having the Elections Board get together to do 14 that certification. 15 WOMAN 2: So, today? 16 GABRIEL STERLING: It has to be today. 17 It will have to be today. 18 WOMAN 2: How will we know? Are you 19 guys (indiscernible)? 20 GABRIEL STERLING: Yeah, we probably 21 will. All right, anything else? All right. 22 Thank you all. 23 24 25</p>
